

clever and efficient

Ebnat is tidy and clearly arranged, even at the point of sale.

Presenting products in the best possible way in a small space in order to promote sales can be crucial at the POS. Benefit from our long-standing experience with presentations. Be it on a display, on a standard peg-board or using your own system – we offer you advice and sample layouts for your presentation.

New and interesting products, such as the ÜX, will convince you with their special features, natural materials and specific look. Ideal for a display and a worthwhile customer pitch.

ÜX – The Superbroom!

Ebnat products are a statement for modern ideas and reliable quality.

ÜX The Superbroom provides evidence that excellent design can be both functional and effective.

In the last 100 years, Ebnat has continuously implemented product improvements and optimised its manufacturing techniques. In-house designers and engineers test and perfect Ebnat's products that are manufactured in state-of-the-art production facilities. Market experts explore the latest trends and requirements in order to provide the traditional brush-making trade with ever-new stimuli.

Ebnat stands for typically Swiss characteristics in the best sense of the term.

ÜX is without exception made from certified FSC wood, recycled plastic, pure horsehair, coco and other natural materials. Quality and sustainability are the pillars of our product philosophy. Resource-saving raw materials and properly functioning brooms guarantee satisfied customers.

An unusual product range for everyday work

With ÜX, Ebnat meets a number of requirements. No more cumbersome work!

Traditionally, fine dirt is removed by pulling the broom, whilst tough dirt is easier to clean with pushing movements. With its patented handle joint, ÜX masters both tasks brilliantly.

A broad broom is used for large surfaces, whilst a small stiff brush is ideal for corners and places that are difficult to reach.

With its narrow and extra-dense brush head, ÜX manages to do both.

A hand brush is needed to clean up minor accidents or to brush swept up dirt onto the dustpan.

With its ultra-shallow hand brush, which also boasts a handle joint, ÜX is capable of even more.

ÜX – The Superbroom!

The hard-wearing wooden handle and the lightweight metal handle are particularly well-suited for this product range.

The patented handle joint allows you to push and pull the broom.

Sustainability is our guiding principle, therefore Ebnat uses Swiss FSC beech wood and recycled plastic for the ÜX.

With the extra-narrow brush, cleaning places that are difficult to reach is child's play.

Pure horsehair is the preferred edging material for interior spaces, whilst coco is ideal for exterior application.

The dense press cut optimises the cleaning performance; the brush head also removes tough dirt in one sweep.
