

Interdental brushes out of paper

Sustainable oral hygiene

Innovative and functional - however, the sustainable aspect is at least as important with this interdental brush: The brush bodies are made of FSC®-MIX and FDA-certified paper. The CO₂ value of the paper variant is more than 8x lower compared to a brush of the same weight made of plastic.

The brushes are packed in bags made of FSC® certified uncoated fresh fibre paper. The bags comply with the PTS-RH 021/97 test method for paper recycling and can be disposed of in the waste paper.

The plastic-coated wire makes brushing particularly gentle on enamel.

variable length and diameter
(standard: length 47mm,
diameter 4mm)

high quality trim materials

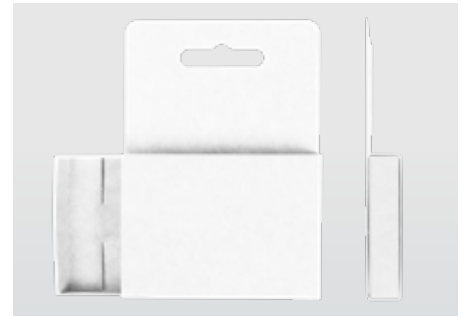

handle with individual logo laser
engraving for your own label

manufactured in highest quality
thanks to most modern technology

recyclable bag made of uncoated
fresh fibre paper, with number of
pieces of your choice

practical sliding box as a reusable
storage option

	Size according to ISO 16409	Wire thickness	Brush diameter	Wire diameter
	0	0.38 mm	1.8 mm	0.18 mm
	1	0.45 mm	2 mm	0.20 mm
	2	0.5 mm	3 mm	0.25 mm
	3-5 conical	0.5 mm	2.5 - 5 mm	0.25 mm
	6	0.5 mm	6 mm	0.25 mm
