

Universal brush

A real all-rounder

Whether it's a joint, groove, hollow, surface, edge or other hard-to-reach places, our universal brush gets everywhere thanks to its two clever brush cuts.

A scratching edge that combats even the most stubborn dirt. Radially arranged bristles for larger, uneven surfaces and the narrow bristle comb for efficient cleaning of the most inaccessible places, round off its profile and make it a real all-rounder.

Thanks to the hook integrated in the brush head, it can be easily hung on various rods, hooks and profiles such

as cupboard door handles, cloth holders and much more. So this useful helper is always at hand.

The ergonomic shape of the brush not only ensures optimal cleaning performance, the brush also lies comfortably in the hand.

We call it the universal brush. For your assortment it might also be called a coffee machine brush, dishwasher brush or smoothie maker brush. In this way, a special brush is adapted to the individual, specific needs in the turn of a hand.

narrow bristle comb for efficient cleaning of hard-to-reach areas

radially arranged bristles for uneven and larger surfaces

extremely useful for cleaning edges and recessed grooves

scraper edge for stubborn dirt

practical hanging hook

eroded handle surface for the necessary grip during use
